PROJECT OVERVIEW

Scholar Live is an online learning platform where people can find different types of courses. You can directly join the online course, discuss with the teacher and students, do the homework at the end of each class, and you can also have a discussion with the course members through the discussion chat.

PROBLEMS:

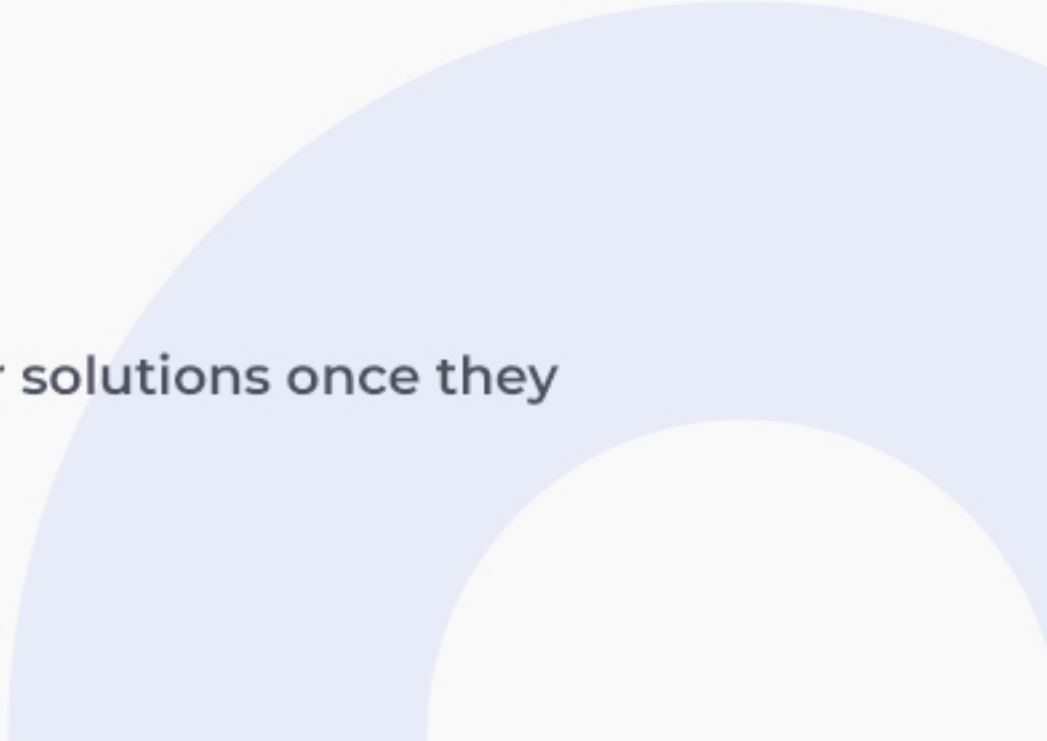

While studying the market we interviewed a number of people who regularly take online lessons and marked some problems which we can summarize in the following points:

- During recorded course, the student cannot mention his problems.
 - Disability to talk to or discuss with the teacher during the session.
 - There is no competition between students attending the offline course.
 - 75% of students do not usually do homework associated with recorded lessons.
- 

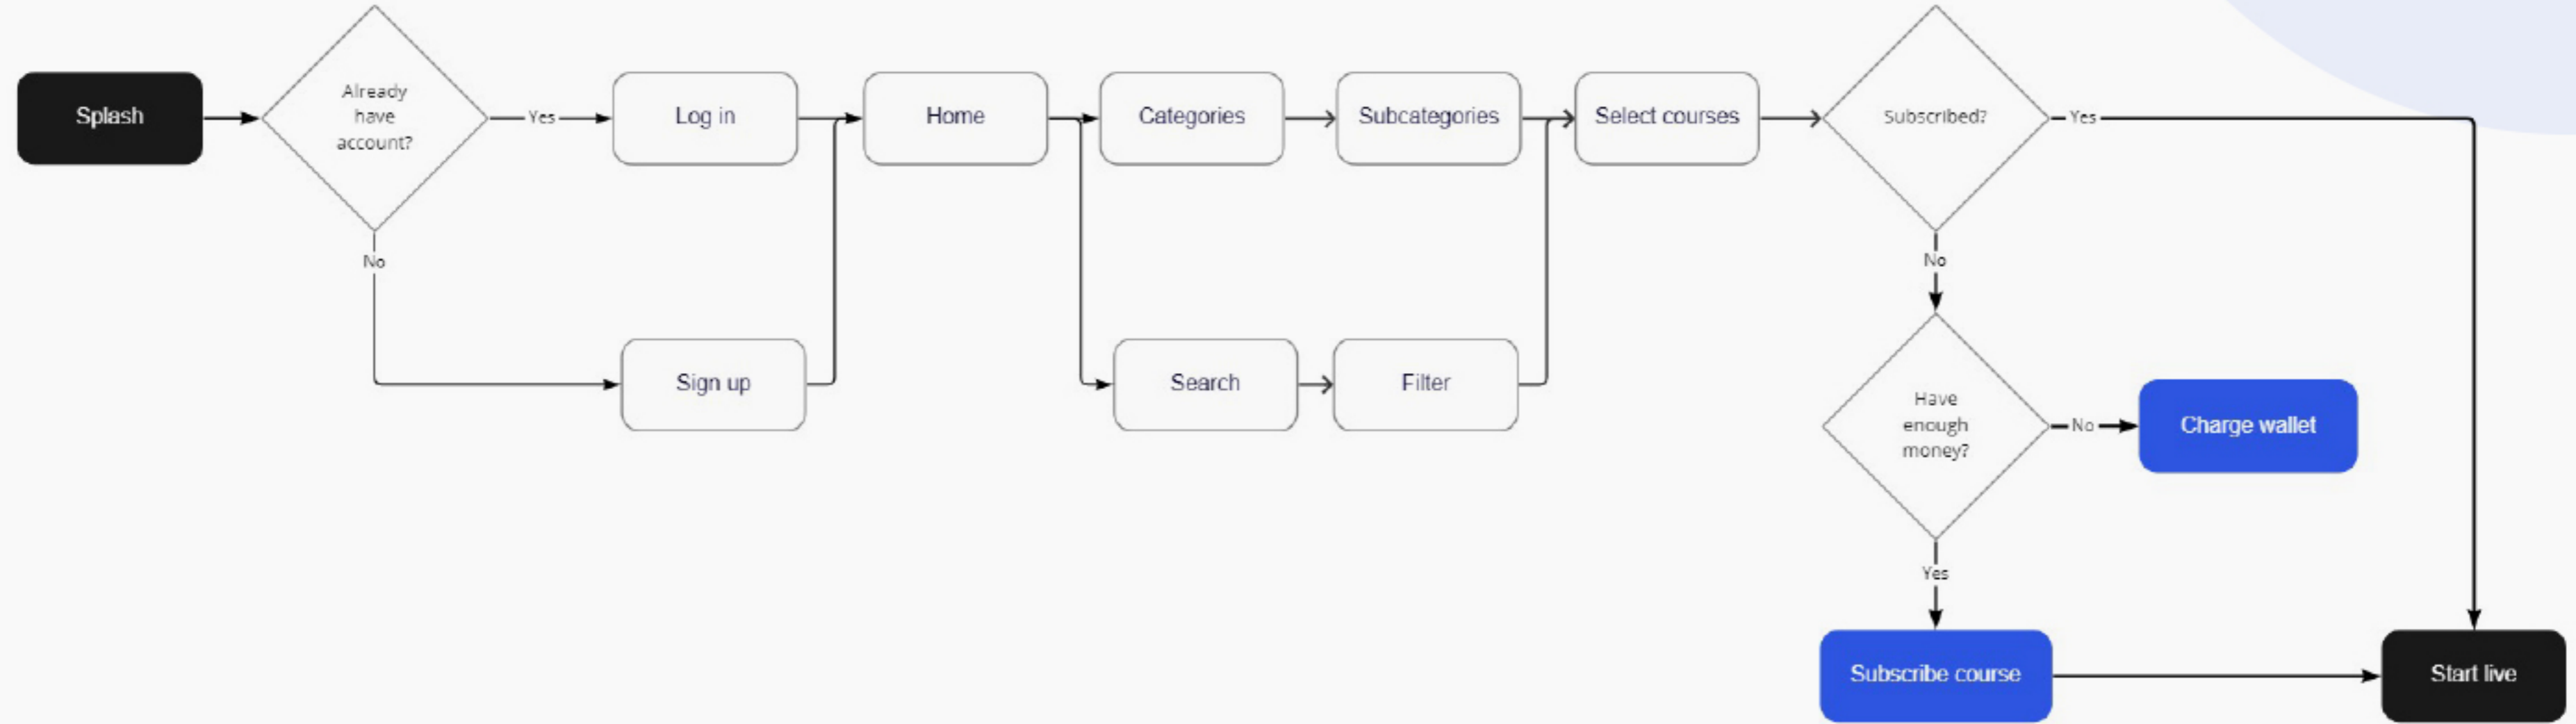

SOLUTIONS:

We applied the following solutions to solve the encountered problems:

- Live course.
 - Allowing teachers to use live whiteboard in order to display simple illustrations.
 - Providing discussion between students and their teacher using a group chat.
 - Every scheduled session assigned with a homework which students can download then upload their solutions once they are done.
-

TRY TO USE WHITEBOARD

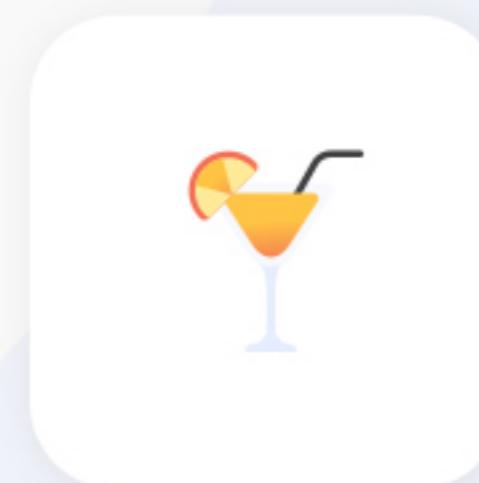

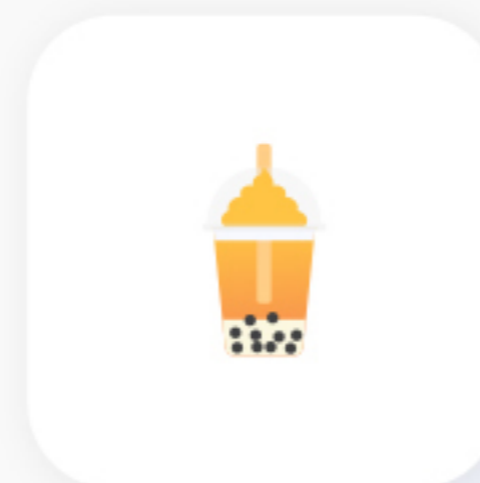

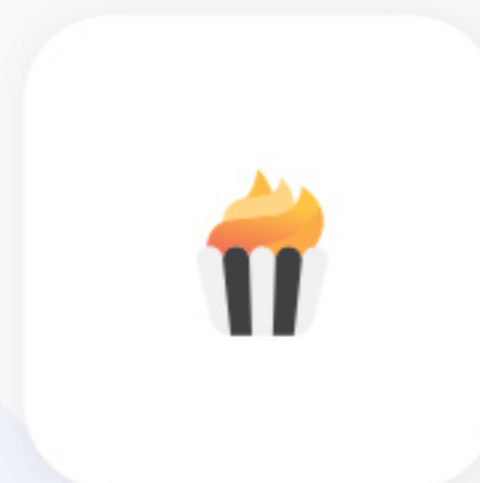

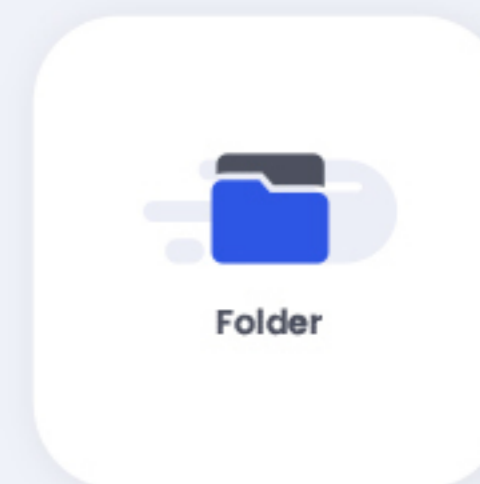

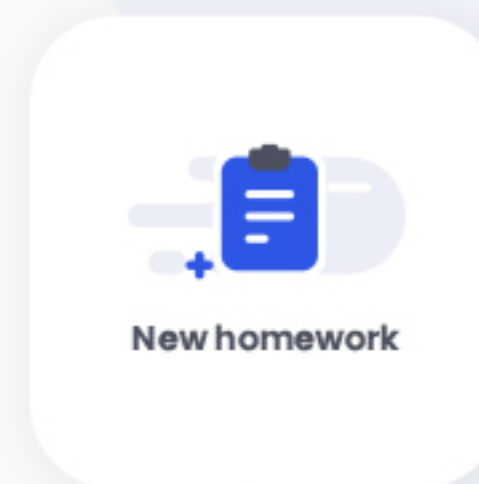

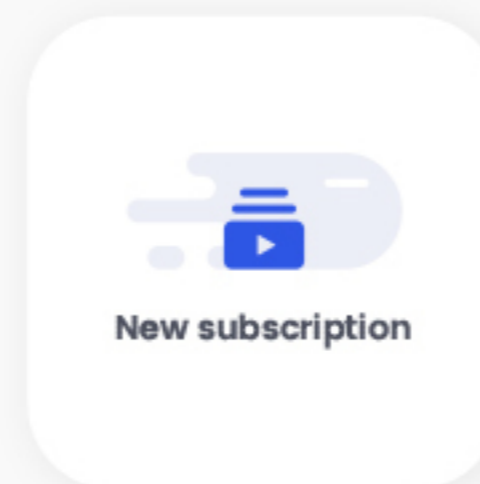

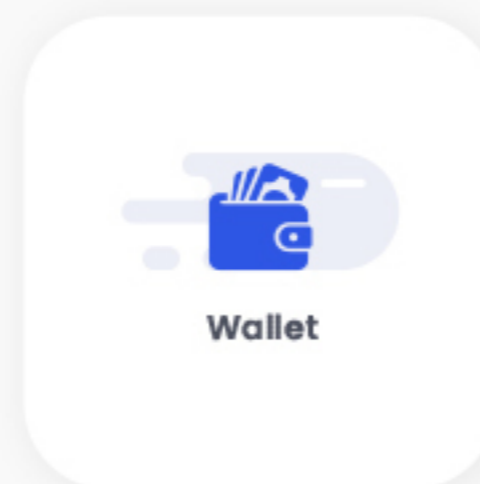

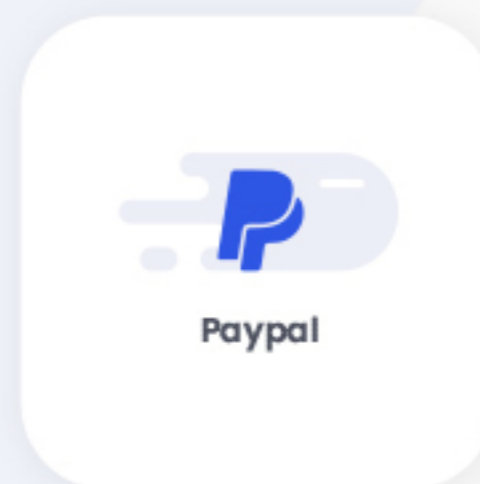

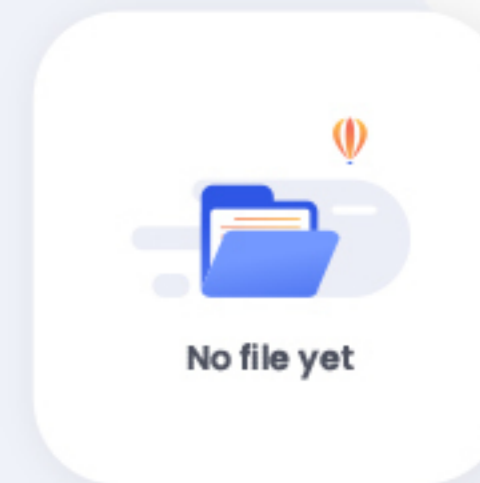

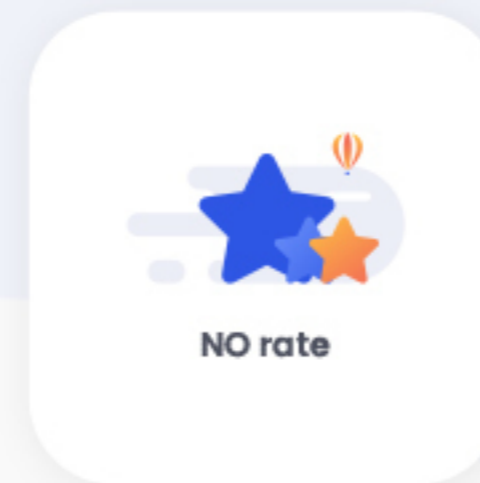

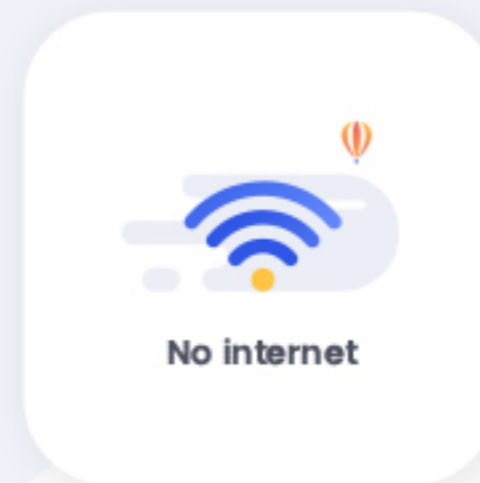

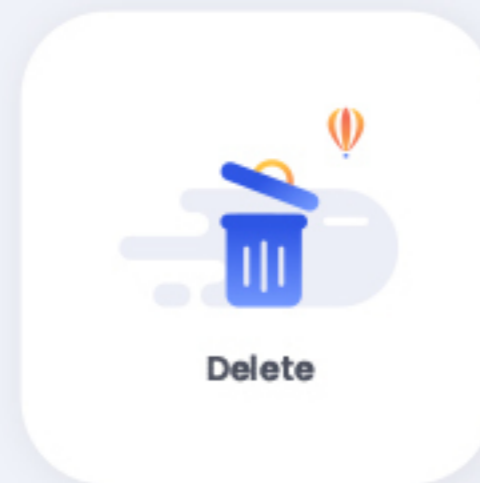

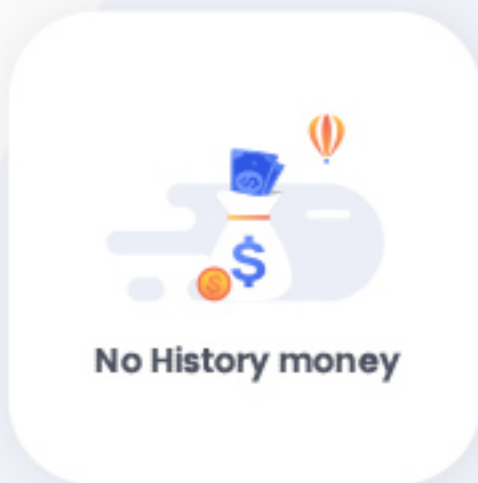

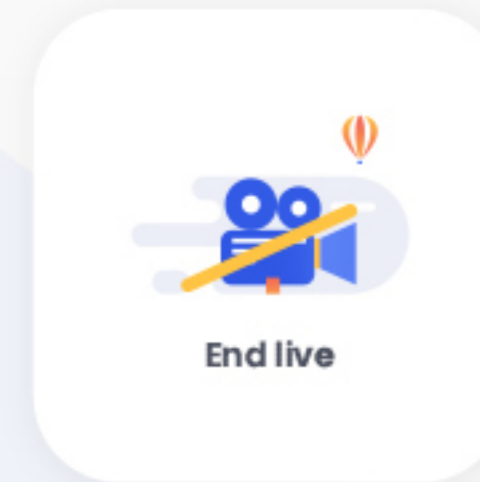

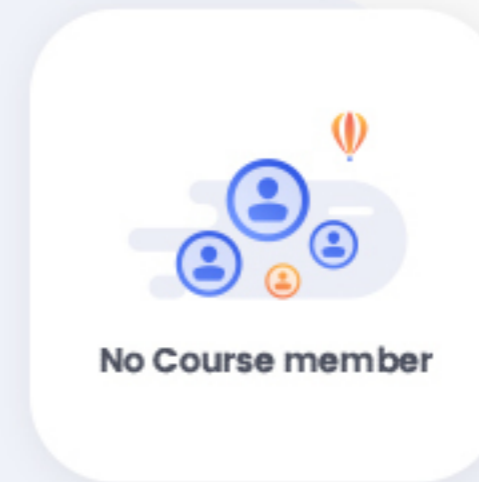

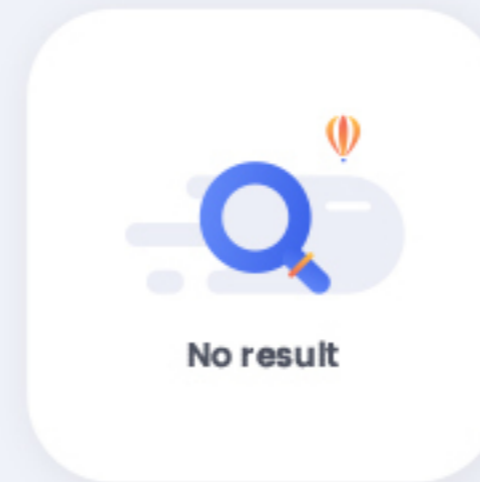

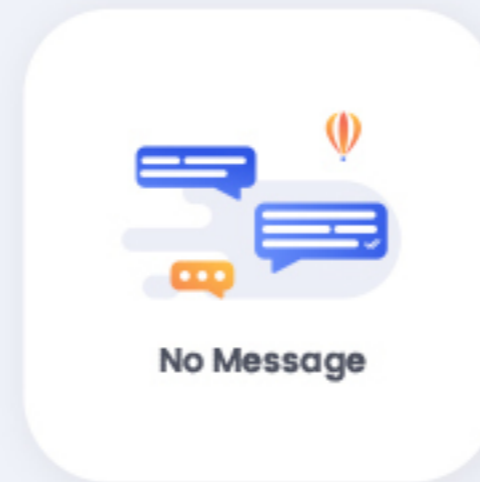

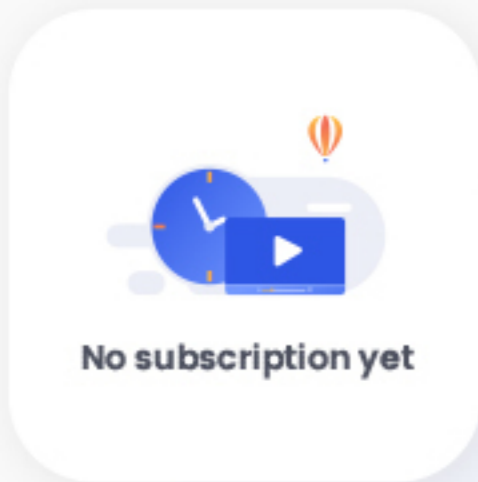

The whiteboard is a very important feature, this whiteboard can give you more flexible and easy to teach

The screenshot displays a web browser window with a search bar at the top. The page content includes the Scholar logo, a trial lesson timer at 00:34:15, and a toolbar with icons for chat, clipboard, folder, and users. The main area features a whiteboard with a 'welcome To scholar' message and a toolbar with icons for eraser, highlighter, pencil, text, and settings. A video thumbnail of a man is visible in the bottom left. On the right, there is a 'ALL COMMENTS' section with 32 members, listing comments from Keanu Sanders, Patricia Jordan, Marilyn Lee, and Emma Bradley. A 'Write a comment...' input field is at the bottom of the comments section. Below the whiteboard, an 'ONLINE VIDEO' section shows five video thumbnails of people in a virtual meeting.

EMPTY STATE & VECTORS

To transmit feelings of comfort to the user and give a friendly platform impression
