

# CALLIGRAFFITI

Calligraffiti is an art form that combines calligraphy, typography, and graffiti. It can be classified as abstract expressionism. It is a visual art that integrates letters into compositions that attempt to communicate a broader message through writing that has been aesthetically altered to move beyond the literal meaning. Simply put, it is the conscious effort of making a word or group of words into a visual composition. As such it is meant to be both an aesthetic experience and provocative art— it is mixing tradition and precision.
