2023

Introduction

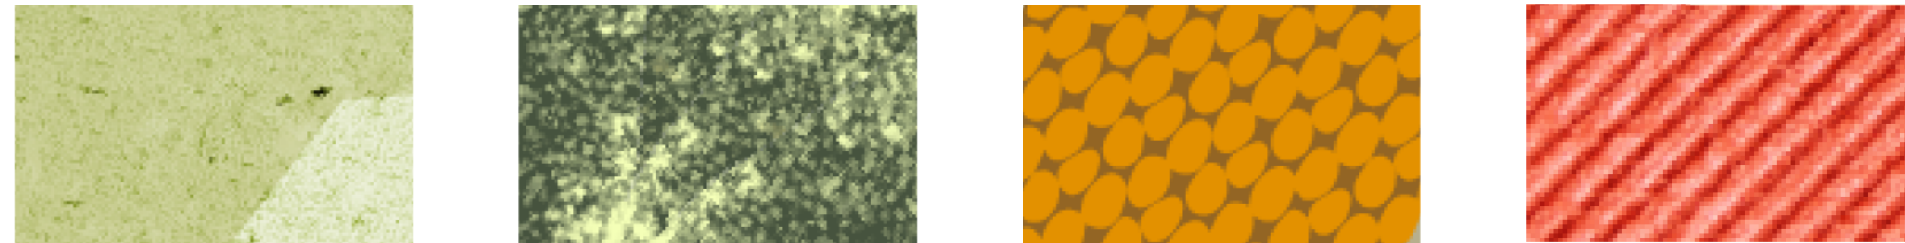

More than 258 million people faced acute food insecurity in 2022, up from 193 million in 2021. What is exacerbating this crisis, and why is the world unable to solve it?

My goal is to create outstanding visuals inspired by food and climate, giving me the freedom to explore and discuss various topics through my designs.

Story visual Identity

To reflect the spirit of the Story I was
Inspired by organic and food texture to
help me create the visuals

Netural Colors

Accent Colors

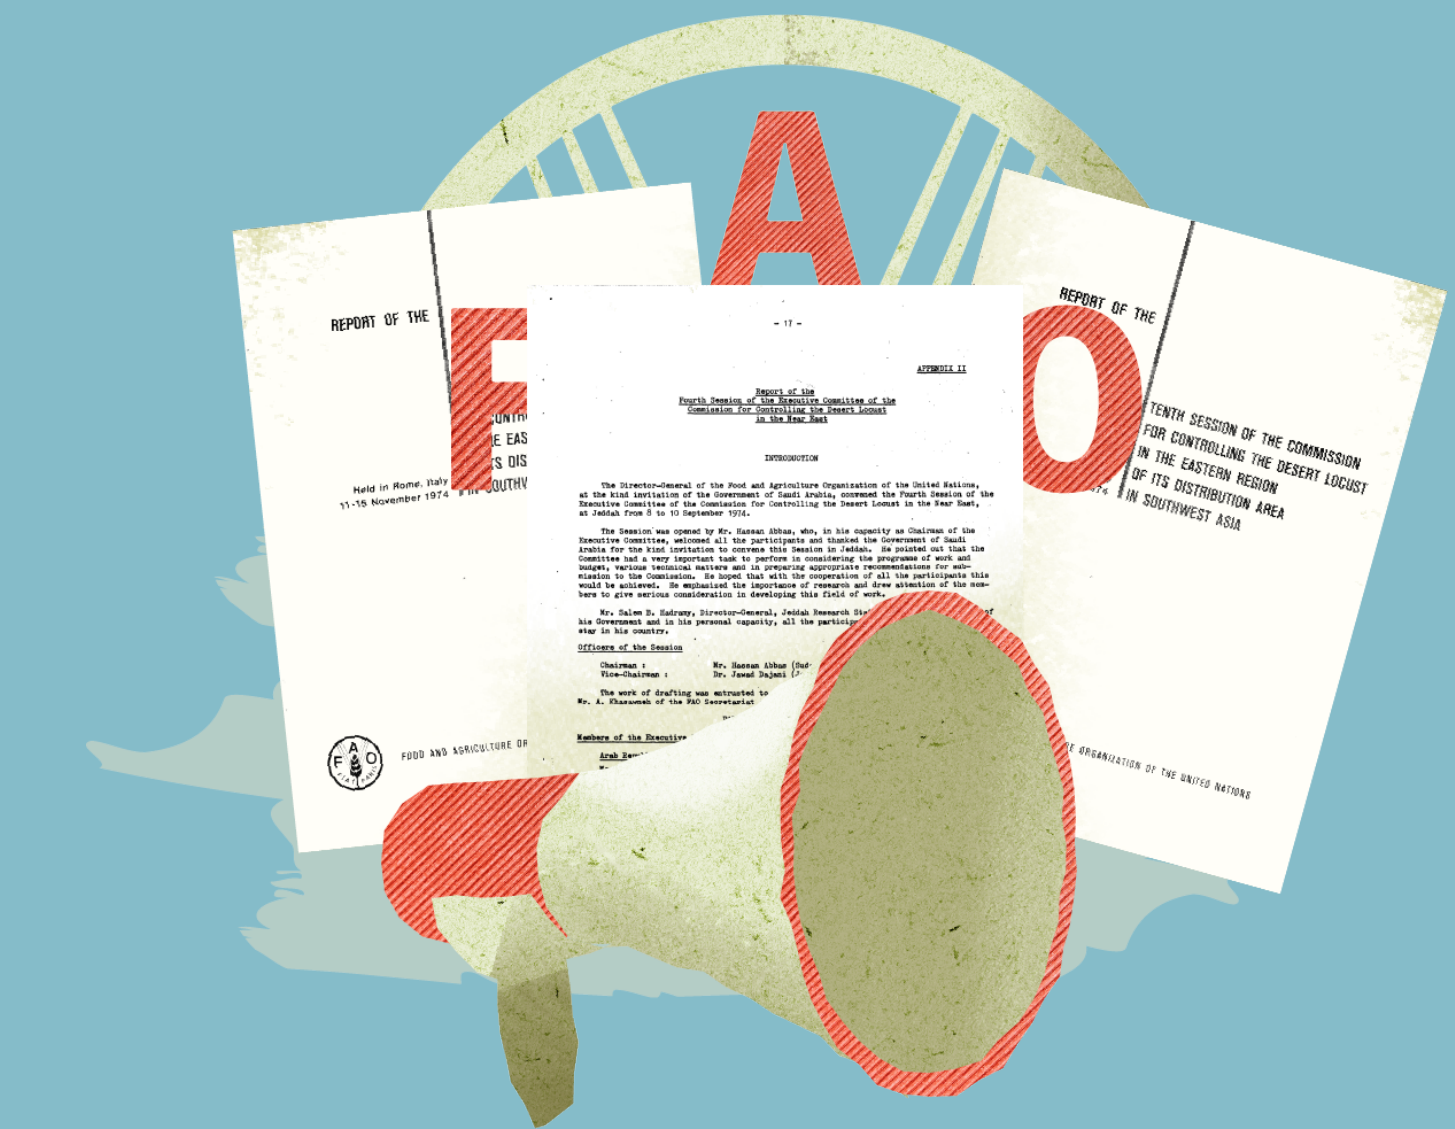

Statistical Visuals

Using consistent textures and themes in statistical visuals helps create a unique and cohesive style. This approach ensures that all elements are visually harmonious, making the data presentation more impactful and memorable.
